SUBJECT INDEX

A

Abdominal pain
Abdominal pain due to acute intermittent porphyria: When is the sound of hoof-beats not horses, but zebras? A case report, (3):103

Acute coronary syndrome
Broken hearts: Differentiating stress-induced cardiomyopathy from acute myocardial infarction in the patient presenting with acute coronary syndrome, (6):247

Acute intermittent porphyria
Abdominal pain due to acute intermittent porphyria: When is the sound of hoof-beats not horses, but zebras? A case report, (3):103

Adolescents
Body mass index basics for critical care nurses, (4):157
Follow-up of long-term use of dexamethasone in premature infants shows health benefits as teenagers (research abstract), (2):87

Advance directives
Texas Advance Directives Act helps families make healthcare decisions (research abstract), (5):243

Advanced life support
Therapeutic hypothermia after cardiac arrest, (2):71

Airway disease
An overview of asthma, (6):264

Amyloidosis
The recognition and treatment of amyloidosis in the critical care patient, (4):161

Asthma
An overview of asthma, (6):264

B

Bilevel positive airway pressure
The role of noninvasive ventilation:

CPAP and BiPAP in the treatment of congestive heart failure, (2):66

Biomarker

B-type natriuretic peptide rapid assay: A diagnostic test for heart failure, (4):149

Body mass index

Body mass index basics for critical care nurses, (4):157

Book reviews

AACN Protocols for Practice: Noninvasive Monitoring, by SM Burns (Ed.), (6):272

Caring for the Caregiver: 8 Truths to Prolong Your Career, by MA Sherburn, (4):182

Case Studies in Nursing Ethics, 3/e, by ST Fry and RM Veatch, (3):127

Critical Thinking and Clinical Judgment, by Marilyn Jackson, Donna D. Ignatavicius and Betty Case, (5):226

Essentials of Patient Education, by SB Bastable, (3):126

Smart Technology for Aging, Disability and Independence: The State of the Science, by William C. Mann (Ed.), (2):86

Synergy for Clinical Excellence: The AACN Synergy Model for Patient Care, by Sonya R. Hardin and Roberta Kaplow, (5):227

Brain

Anatomy and physiology of neurological compensatory mechanisms, (5):197

Chorioamnionitis found not to be related to prematurity (research abstract), (5):243

Bronchopulmonary dysplasia

Lucinactant is better than poractant alfa in preventing BPD in premature infants (research abstract), (3):128

Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128

C

Cardiac arrest

Therapeutic hypothermia after cardiac arrest, (2):71

Cardiac catheterization

Predictors of vascular complications post diagnostic cardiac catheterization and percutaneous coronary interventions, (3):137

Cardiomyopathy

Broken hearts: Differentiating stress-induced cardiomyopathy from acute myocardial infarction in the patient presenting with acute coronary syndrome, (6):247

Cardiorespiratory system

Cardiorespiratory monitor use in infants can be predicted based on initial usage and family factors (research abstract), (1):33

Centers for Disease Control

A message from the Centers for Disease Control, (6):273

Central nervous system

Anatomy and physiology of neurological compensatory mechanisms, (5):197

The challenges of managing and treating Guillain-Barré syndrome during the acute phase, (6):256

Chorioamnionitis found not to be related to prematurity (research abstract), (5):243

Cerebral ischemia

Anatomy and physiology of neurological compensatory mechanisms, (5):197

Children. *See also* Pediatrics

Body mass index basics for critical care nurses, (4):157

Should we allow children to visit ill parents in intensive care units?, (6):269

Chorioamnionitis

Chorioamnionitis found not to be related to prematurity (research abstract), (5):243

Circadian rhythms

Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130

Cognitive impairment

Clinical research with cognitively impaired subjects: Issues for nurses, (2):89

Cognitive impairment in heart failure, (3):93

Community hospital

Innovative solutions: Development and implementation of a tight blood glucose management protocol: One community hospital's experience, (2):62

Compensatory mechanisms, neurological

Anatomy and physiology of neurological compensatory mechanisms, (5):197

Competence

Competence in critical care: What it is and how to gain it: A qualitative study from the staff's point of view, (2):77

Complementary and alternative modalities

Critically ill patients' use of complementary and alternative modalities (editorial), (1):52

Managing requests regarding herbal remedies for patients in the intensive care unit, (3):110

Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130

Conflict management

An overview of conflict, (1):22

Congestive heart failure

B-type natriuretic peptide rapid assay: A diagnostic test for heart failure, (4):149

The recognition and treatment of amyloidosis in the critical care patient, (4):161

A retrospective pilot study: Management of patients with heart failure, (5):228

The role of noninvasive ventilation: CPAP and BiPAP in the treatment of congestive heart failure, (2):66

Continuous positive airway pressure

The role of noninvasive ventilation: CPAP and BiPAP in the treatment of congestive heart failure, (2):66

Coping mechanisms

Reported stressors and ways of coping utilized by intensive care unit nurses, (4):185

Coronary artery disease

Coronary artery disease in women, (5):209

Cost-effectiveness

Standardizing adult tracheostomy tube styles: What is the clinical and cost-effective impact?, (1):35

Critically ill patients

Critically ill patients' use of complementary and alternative modalities (editorial), (1):52

A current conflict: Use of isotonic sodium chloride solution on endotracheal suctioning in critically ill patients, (1):11
Identification of special care needs: The comparison of the cardiothoracic intensive care unit patient and the nurse, (6):275
Should we allow children to visit ill parents in intensive care units?, (6):269
Strategies to meet the needs of families of critically ill patients, (3):121

D
Deep vein thrombosis
Deep vein thrombosis in hospitalized patients: A review of evidence-based guidelines for prevention, (2):53
Delivery, preterm
Health of women prior to pregnancy shown to affect incidence of preterm delivery (research abstract), (1):33
Dexamethasone
Follow-up of long-term use of dexamethasone in premature infants shows health benefits as teenagers (research abstract), (2):87

E
Editorials
Answering without an answer, (5):246
Critically ill patients' use of complementary and alternative modalities (editorial), (1):52
End of life—personal experiences, (4):196
Giving thanks, (6):288
Leadership, (2):93
One of those days?, (3):147
Education
He's got a gun! Weapons in the emergency room—You can survive, (2):82, (4):180 (erratum)
Innovative solutions: Pharmacy and nursing collaboration on a high-risk medication project, (1):29
A message from the Centers for Disease Control, (6):273
Embolism
Deep vein thrombosis in hospitalized patients: A review of evidence-based guidelines for prevention, (2):53
Emergency management
Abdominal pain due to acute intermittent porphyria: When is the sound of hoof-beats not horses, but zebras? A case report, (3):103
Treatment and prevention of pediatric heat-related illnesses at mass gatherings and special events, (4):165
Emergency room
He's got a gun! Weapons in the emergency room—You can survive, (2):82, (4):180 (erratum)
End-of-life care
Letter to the editor, (3):143, (3):144 (reply)
Separating medical and ethical: Helping families determine the best interests of loved ones, (5):216
Endotracheal suctioning
A current conflict: Use of isotonic sodium chloride solution on endotracheal suctioning in critically ill patients, (1):11
Ethical issues
Clinical research with cognitively impaired subjects: Issues for nurses, (2):89
Separating medical and ethical: Helping families determine the best interests of loved ones, (5):216
Texas Advance Directives Act helps families make healthcare decisions (research abstract), (5):243
Extracorporeal membrane oxygenation
A personal reflection: Tactile music therapy at night for patients on ECMO in the pediatric intensive care setting, (4):172

F
Families
Letter to the editor, (3):143, (3):144 (reply)
A look at critical care visitation: The case for flexible visitation, (4):175
Managing requests regarding herbal remedies for patients in the intensive care unit, (3):110
Separating medical and ethical: Helping families determine the best interests of loved ones, (5):216
Should we allow children to visit ill parents in intensive care units?, (6):269
Strategies to meet the needs of families of critically ill patients, (3):121
Texas Advance Directives Act helps families make healthcare decisions (research abstract), (5):243

G
Gender bias
Coronary artery disease in women, (5):209
Glucose management protocol
Innovative solutions: Development and implementation of a tight blood glucose management protocol: One community hospital's experience, (2):62
Guillain-Barré syndrome
The challenges of managing and treating Guillain-Barré syndrome during the acute phase, (6):256
Guns
He's got a gun! Weapons in the emergency room—You can survive, (2):82, (4):180 (erratum)

H
Heart disease
Broken hearts: Differentiating stress-induced cardiomyopathy from acute myocardial infarction in the patient presenting with acute coronary syndrome, (6):247
Coronary artery disease in women, (5):209
Heart failure. *See also* Congestive heart failure
Cognitive impairment in heart failure, (3):93
A retrospective pilot study: Management of patients with heart failure, (5):228
Heart rates
Subtle heart rates are predictive of neonatal sepsis (research abstract), (4):183
Heat-related illnesses
Treatment and prevention of pediatric heat-related illnesses at mass gatherings and special events, (4):165
Helicobacter pylori
Fecal antigen tests can identify pediatric cases of *H. pylori* (research abstract), (2):87

Herbal remedies
Managing requests regarding herbal remedies for patients in the intensive care unit, (3):110
High-risk/high-alert medications
Innovative solutions: Pharmacy and nursing collaboration on a high-risk medication project, (1):29
Homeopathy
Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130
Hyperbaric oxygenation therapy
Multiple dimensions of caring for a patient with acute necrotizing fasciitis, (1):15
Hypothermia
Therapeutic hypothermia after cardiac arrest, (2):71

I
In memorium
Janet T. Ihlenfeld, PhD, RN, (5):226
Influenza vaccination
A message from the Centers for Disease Control, (6):273
Intensive care unit. *See also* Neonatal intensive care unit
Intensive care research coordinators: Who are they and what do they do?, (5):234
Managing requests regarding herbal remedies for patients in the intensive care unit, (3):110
Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130
Prevention of ventilator-associated pneumonia, (5):205
Reported stressors and ways of coping utilized by intensive care unit nurses, (4):185
Should we allow children to visit ill parents in intensive care units?, (6):269
Intracranial pressure
Anatomy and physiology of neurological compensatory mechanisms, (5):197
Intubation
A current conflict: Use of isotonic sodium chloride solution on endotracheal suctioning in critically ill patients, (1):11
Standardizing adult tracheostomy tube styles: What is the clinical and cost-effective impact?, (1):35

J
JCAHO
Innovative solutions: Pharmacy and nursing collaboration on a high-risk medication project, (1):29
Prevention of ventilator-associated pneumonia, (5):205

K
Kidney
The effects of vasopressin on the renal system in vasodilatory shock, (1):1

L
Leadership
An overview of conflict, (1):22
Competence in critical care: What it is and how to gain it: A qualitative study from the staff's point of view, (2):77
A diamond in the rough, to a polished gemstone ring: Writing for publication in a nursing journal, (3):113
A look at critical care visitation: The case for flexible visitation, (4):175
A personal reflection: Tactile music therapy at night for patients on ECMO in the pediatric intensive care setting, (4):172
Root cause analysis and nursing management responsibilities in wrong-site surgery, (5):221
Separating medical and ethical: Helping families determine the best interests of loved ones, (5):216
Should we allow children to visit ill parents in intensive care units?, (6):269
Strategies to meet the needs of families of critically ill patients, (3):121
Legal issues
Separating medical and ethical: Helping families determine the best interests of loved ones, (5):216
Letter to the editor
End-of-life care, (3):143, (3):144 (reply)
Literature review
A diamond in the rough, to a polished gemstone ring: Writing for publication in a nursing journal, (3):113
Low birth weight infants
Characteristics differ according to region in rates low-birth-weight infants (research abstract), (4):183
Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128
Lucinactant
Lucinactant is better than poractant alfa in preventing BPD in premature infants (research abstract), (3):128
Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128

M
Mass gathering or special event
Treatment and prevention of pediatric heat-related illnesses at mass gatherings and special events, (4):165
Medications
Innovative solutions: Pharmacy and nursing collaboration on a high-risk medication project, (1):29
Memory
Cognitive impairment in heart failure, (3):93
Minerals
Managing requests regarding herbal remedies for patients in the intensive care unit, (3):110
Muscle weakness
The challenges of managing and treating Guillain-Barré syndrome during the acute phase, (6):256
Music therapy
A personal reflection: Tactile music therapy at night for patients on ECMO in the pediatric intensive care setting, (4):172
Myocardial infarction
Broken hearts: Differentiating stress-induced cardiomyopathy from acute myocardial infarction in the patient presenting with acute coronary syndrome, (6):247

N
Natriuretic peptide, B-type
B-type natriuretic peptide rapid assay: A diagnostic test for heart failure, (4):149
Necrotizing fasciitis
Multiple dimensions of caring for a patient with acute necrotizing fasciitis, (1):15

Neonatal intensive care unit
'Parental role conflict' nursing diagnosis validated for neonatal intensive care unit use (research abstract), (6):283
A personal reflection: Tactile music therapy at night for patients on ECMO in the pediatric intensive care setting, (4):172
Radiation doses of x-rays in premature infants found to be low (research abstract), (6):283
Texas Advance Directives Act helps families make healthcare decisions (research abstract), (5):243
Neonatal sepsis
Subtle heart rates are predictive of neonatal sepsis (research abstract), (4):183
Neurology/Neurologic disease
Anatomy and physiology of neurological compensatory mechanisms, (5):197
The challenges of managing and treating Guillain-Barré syndrome during the acute phase, (6):256
Chorioamnionitis found not to be related to prematurity (research abstract), (5):243
Noninvasive ventilation
The role of noninvasive ventilation: CPAP and BiPAP in the treatment of congestive heart failure, (2):66
No-Shift-Lag
Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130
Nurse coordinator
Intensive care research coordinators: Who are they and what do they do?, (5):234
Nursing diagnoses
'Parental role conflict' nursing diagnosis validated for neonatal intensive care unit use (research abstract), (6):283
Nursing staff
Competence in critical care: What it is and how to gain it: A qualitative study from the staff's point of view, (2):77
Identification of special care needs: The comparison of the cardiothoracic intensive care unit patient and the nurse, (6):275
Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130
Reported stressors and ways of coping utilized by intensive care unit nurses, (4):185

O
Obesity
Body mass index basics for critical care nurses, (4):157
Overweight youth
Body mass index basics for critical care nurses, (4):157
Oximetry
Knowledge of pulse oximetry among critical care nurses, (1):44
Oxygen management
Knowledge of pulse oximetry among critical care nurses, (1):44

P
Pain, abdominal
Abdominal pain due to acute intermittent porphyria: When is the sound of hoof-beats not horses, but zebras? A case report, (3):103
Paralysis
The challenges of managing and treating Guillain-Barré syndrome during the acute phase, (6):256
Patient needs
Identification of special care needs: The comparison of the cardiothoracic intensive care unit patient and the nurse, (6):275
Patient safety
Root cause analysis and nursing management responsibilities in wrong-site surgery, (5):221
Pediatric intensive care unit. *See also* Neonatal intensive care unit
A personal reflection: Tactile music therapy at night for patients on ECMO in the pediatric intensive care setting, (4):172
Pediatrics
Body mass index basics for critical care nurses, (4):157
Cardiorespiratory monitor use in infants can be predicted based on initial usage and family factors (research abstract), (1):33
Characteristics differ according to region in rates low-birth-weight infants (research abstract), (4):183
Chorioamnionitis found not to be related to prematurity (research abstract), (5):243
Fecal antigen tests can identify pediatric cases of *H. pylori* (research abstract), (2):87
Follow-up of long-term use of dexamethasone in premature infants shows health benefits as teenagers (research abstract), (2):87
Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128
'Parental role conflict' nursing diagnosis validated for neonatal intensive care unit use (research abstract), (6):283
A personal reflection: Tactile music therapy at night for patients on ECMO in the pediatric intensive care setting, (4):172
Radiation doses of x-rays in premature infants found to be low (research abstract), (6):283
Subtle heart rates are predictive of neonatal sepsis (research abstract), (4):183
Texas Advance Directives Act helps families make healthcare decisions (research abstract), (5):243
Treatment and prevention of pediatric heat-related illnesses at mass gatherings and special events, (4):165
Percutaneous coronary intervention
Predictors of vascular complications post diagnostic cardiac catheterization and percutaneous coronary interventions, (3):137
Pharmacy
Innovative solutions: Pharmacy and nursing collaboration on a high-risk medication project, (1):29
Pneumonia
Prevention of ventilator-associated pneumonia, (5):205
Poractant alfa
Lucinactant is better than poractant alfa in preventing BPD in premature infants (research abstract), (3):128
Porphyria
Abdominal pain due to acute intermittent porphyria: When is the sound of hoof-beats not horses, but zebras? A case report, (3):103

Pregnancy
Health of women prior to pregnancy shown to affect incidence of preterm delivery (research abstract), (1):33
Premature infants
Chorioamnionitis found not to be related to prematurity (research abstract), (5):243
Follow-up of long-term use of dexamethasone in premature infants shows health benefits as teenagers (research abstract), (2):87
Lucinactant is better than poractant alfa in preventing BPD in premature infants (research abstract), (3):128
Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128
Radiation doses of x-rays in premature infants found to be low (research abstract), (6):283
Preterm delivery
Health of women prior to pregnancy shown to affect incidence of preterm delivery (research abstract), (1):33
Prevention
Deep vein thrombosis in hospitalized patients: A review of evidence-based guidelines for prevention, (2):53
Publishing
A diamond in the rough, to a polished gemstone ring: Writing for publication in a nursing journal, (3):113
Pulmonary complications
Prevention of ventilator-associated pneumonia, (5):205
Pulse oximetry
Knowledge of pulse oximetry among critical care nurses, (1):44

Q
Quality of life
Separating medical and ethical: Helping families determine the best interests of loved ones, (5):216

R
Radiology
Radiation doses of x-rays in premature infants found to be low (research abstract), (6):283
Renal system
The effects of vasopressin on the renal system in vasodilatory shock, (1):1
Research
Clinical research with cognitively impaired subjects: Issues for nurses, (2):89
Competence in critical care: What it is and how to gain it: A qualitative study from the staff's point of view, (2):77
Identification of special care needs: The comparison of the cardiothoracic intensive care unit patient and the nurse, (6):275
Intensive care research coordinators: Who are they and what do they do?, (5):234
Knowledge of pulse oximetry among critical care nurses, (1):44
Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130
Predictors of vascular complications post diagnostic cardiac catheterization and percutaneous coronary interventions, (3):137
Reported stressors and ways of coping utilized by intensive care unit nurses, (4):185
A retrospective pilot study: Management of patients with heart failure, (5):228
Standardizing adult tracheostomy tube styles: What is the clinical and cost-effective impact?, (1):35
Research coordinator
Intensive care research coordinators: Who are they and what do they do?, (5):234
Respiratory care
Standardizing adult tracheostomy tube styles: What is the clinical and cost-effective impact?, (1):35
Respiratory disease
An overview of asthma, (6):264
Respiratory distress syndrome
Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128
Risk factors
Deep vein thrombosis in hospitalized patients: A review of evidence-based guidelines for prevention, (2):53
Predictors of vascular complications post diagnostic cardiac catheterization and percutaneous coronary interventions, (3):137
Prevention of ventilator-associated pneumonia, (5):205
Root cause analysis
Root cause analysis and nursing management responsibilities in wrong-site surgery, (5):221

S
Sentinel events
Root cause analysis and nursing management responsibilities in wrong-site surgery, (5):221
Sepsis
The effects of vasopressin on the renal system in vasodilatory shock, (1):1
Subtle heart rates are predictive of neonatal sepsis (research abstract), (4):183
Shift work
Night shift: Can a homeopathic remedy alleviate shift lag?, (3):130
Shock, vasodilatory
The effects of vasopressin on the renal system in vasodilatory shock, (1):1
Sodium chloride
A current conflict: Use of isotonic sodium chloride solution on endotracheal suctioning in critically ill patients, (1):11
Special care needs
Identification of special care needs: The comparison of the cardiothoracic intensive care unit patient and the nurse, (6):275
Status asthmaticus
An overview of asthma, (6):264
Stress-induced cardiomyopathy
Broken hearts: Differentiating stress-induced cardiomyopathy from acute myocardial infarction in the patient presenting with acute coronary syndrome, (6):247
Stressors
Reported stressors and ways of coping utilized by intensive care unit nurses, (4):185
Sudden infant death syndrome
Cardiorespiratory monitor use in infants can be predicted based on

initial usage and family factors (research abstract), (1):33
Surfactant therapy
Lucinactant is better than poractant alfa in preventing BPD in premature infants (research abstract), (3):128
Lucinactant reduces RDS and BPD in very low birth weight infants (research abstract), (3):128
Surgery
Root cause analysis and nursing management responsibilities in wrong-site surgery, (5):221

T
Technology
Knowledge of pulse oximetry among critical care nurses, (1):44
Terminal care
Letter to the editor, (3):143, (3):144 (reply)
Texas Advance Directives Act helps families make healthcare decisions (research abstract), (5):243
Thrombosis
Deep vein thrombosis in hospitalized patients: A review of evidence-based guidelines for prevention, (2):53
Tracheostomy tubes
Standardizing adult tracheostomy tube styles: What is the clinical and cost-effective impact?, (1):35

V
Vaccination
A message from the Centers for Disease Control, (6):273
Vascular complications
Predictors of vascular complications post diagnostic cardiac catheterization and percutaneous coronary interventions, (3):137
Vasodilatory shock
The effects of vasopressin on the renal system in vasodilatory shock, (1):1
Vasopressin
The effects of vasopressin on the renal system in vasodilatory shock, (1):1
Ventilator-associated pneumonia
Prevention of ventilator-associated pneumonia, (5):205
Violence
He's got a gun! Weapons in the emergency room—You can survive, (2):82, (4):180 (erratum)
Visitation
A look at critical care visitation: The case for flexible visitation, (4):175
Should we allow children to visit ill parents in intensive care units?, (6):269
Strategies to meet the needs of families of critically ill patients, (3):121
Vitamins
Managing requests regarding herbal remedies for patients in the intensive care unit, (3):110

W
Weight loss
The recognition and treatment of amyloidosis in the critical care patient, (4):161
Women
Coronary artery disease in women, (5):209
Health of women prior to pregnancy shown to affect incidence of preterm delivery (research abstract), (1):33
Work environment
Reported stressors and ways of coping utilized by intensive care unit nurses, (4):185
Wound care
Multiple dimensions of caring for a patient with acute necrotizing fasciitis, (1):15
Writing
A diamond in the rough, to a polished gemstone ring: Writing for publication in a nursing journal, (3):113
Wrong-site surgery
Root cause analysis and nursing management responsibilities in wrong-site surgery, (5):221
